

THE IMPACTS OF FERTILIZER

- I-** Oh father, mother, now our farmland is very hard
There is no crop and snail left
Father, mother, what must we think?
Without the money to do farming, how can our family survive?
- II-** Oh mother, we grew rice without using fertilizer in the past
But now why it's changed,
We believe the propaganda that using fertilizer is good
Now we are in chaotic,
It is impossible not to use fertilizer because the land is addicted.
- R-** We owed the money and we cannot pay back because the price of fertilizer increase every year,
Rice yield is not enough to feed us
As we have to sell to pay back to the capitalist, there is nothing left both sons and daughters sell labour to help repay the debt.
- VI-** Uncles and aunts, please stop using chemical fertilizer to grow rice. If you want to keep our soil good, we must change to use natural fertilizer. We do not need to spend money, and your livelihood will be better.
