

WE ARE IN SOLIDARITY TO PROTECT WOMEN'S RIGHTS

- I- Even though we are born as women, we also have equal rights with men. Oh God please look. Our rights have been abused. They don't care. The law tells us that men and women have the same rights, but when we try to demand our rights, men find a way to have power over women.
- II- My husband beat me up. He cursed and told me I was useless. How much I suffer. My husband has a black heart. He never forgives me and he looks down on me. Men regard women as their toys and see them as bad people.
- III- Being women, we should not stand passively and control us. We should stand together and speak with one voice to promote women's rights. Women must be valued like diamonds.
